Directional Control Valve

A guide for selecting the solenoid valve model to accommodate the system
An array of solenoid valves (2/3 port valve) for controlling the ejector/external vacuum supply system

How to read the chart

The solenoid valves are available in the following constructions: the standard product (for general use), the external pilot specification, and the vacuum specification. Select the optimal model in accordance with your circuit configuration and the effective area. For detailed specifications of these products, refer to the respective catalog that is available separately.

Caution on Model Selection

⚠ Caution

- Use a plug cap at R port of 2 port valve and 3 port valve for vacuum release valve and vacuum switching valve. (Except VEX3)
  1) Applications are different from vacuum holding valve.
  2) Refer to the **Web Catalog** for flow rate characteristics.

3 Position Valve VEX3

Refer to the **Web Catalog** for details.

Vacuum suction and release

The 3 port, 3 position double solenoid that permits vacuum suction, release, and suspension (closed) is ideal for a system where many valves are used for a single circuit.

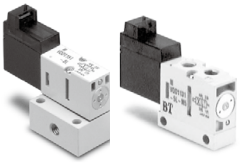
- **Sequential switching operation prevents the inflow of pressurized air into the vacuum pump system.**

⚠Caution

- **To maintain the vacuum of port A via the closed center, be aware that the vacuum could be decreased due to leakage from the vacuum pad and the piping. Furthermore, it cannot be used as an emergency cutoff valve.**

3/4 Port Solenoid Valve VQD

Unprecedented high speed, with stable response times (ON: 4 ms, OFF: 2 ms, Dispersion accuracy ±1 ms) Available in vacuum applications (Up to –101.2 kPa)



Base mounted **Body ported**

Model

Refer to the **Web Catalog** for details.

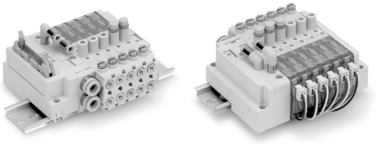
∗ Operating pressure range: 0 to 0.7 MPa for standard products, -101.2 kPa to 0.7 MPa for vacuum specification

Vacuum Release Valve with Throttle Valve SJ3A6

2 spool valves included.
Possible to control vacuum adsorption and release by a valve.

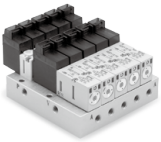
- Current consumption 0.15 W (With energy saving circuit)
- Width 10 mm
  (Same as SJ3000 Series)
- With throttle valve that can control the flow rate of release air
- Replaceable filters are built in the vacuum side and release side respectively
- With a pressure detection port that enables users to connect a pressure switch, etc.
- Can be mounted with a 4 port solenoid valve SJ2000/3000 (Made to Order).
  (Please contact SMC for details.)
- Possible to switch pressure of two wiring systems by applying different positive pressures to 1 (P) port and 3/5 (E). (In this case, flow rate is adjustable only at the P port side.)



Refer to the **Web Catalog** for details.

Vacuum/Release Unit VQD1000-V

- **Response speed**
  13 ms (at 500 mm∗)**/**
  18.5 ms (at 1000 mm∗)
  ∗ Distance from a unit to a workpiece (Piping I.D. ø2.5)
- **Smooth removal of workpiece without overshoot**
  No blow off of workpiece by release air
- **No need to adjust the timing for switch-over vacuum and positive pressure.**
  (Single signal control)
- **No need to set a restriction circuit for release air**

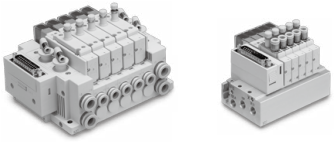


Refer to the **Web Catalog** for details.

Vacuum Release Valve with Restrictor SY3A□R/SY5A□R

Vacuum suction and release can be controlled with a single valve!

- Can be mounted on the same manifold with the standard valve.
  ∗: When the individual EXH spacer is used.



Connector connecting base **Metal base**

Refer to the **Web Catalog** for details.

Body Ported Vacuum Release Valve with Restrictor Made to Order SY5A2R

- **Line for vacuum adsorption transfer**
- **Built-in restrictor in the vacuum release valve**
- **Single unit**
  External pilot type dual 2 port solenoid valve
- **Manifold**
  SS5Y5-20-type (Individual wiring type),

Note 1) When mounting a pressure gauge, use caution not to tighten excessively. Excessive tightening will cause product failure. Use a pipe tape for sealing. Recommended tightening torque: R 1/8: Set between 7 to 9 N·m, R 1/4: 12 to 14 N·m respectively.
Note 2) When using other fluids, please consult with SMC for fluid compatibility information concerning corrosive potential.
Note 3) Movable parts (gear and etc.) in the pressure gauge are made of brass.
Note 4) X3 (wetted parts stainless steel) specifications are not available.
Note 5) Avoid freezing as this may cause a malfunction.
Note 6) The guaranteed temperature range is 23°C ±5°C.

⚠ Specific Product Precautions

Be sure to read this before handling the products. Refer to page 33 for safety instructions.

Selection

⚠Caution

1. Make sure that no direct impact or vibrations are applied to the body.

2. If operating under pressure pulsations or in high frequency operations, please contact SMC.

Mounting

⚠Caution

1. During transport and installation, do not apply shock to the product, such as by dropping doing so will affect its precision.

2. Regarding the installation posture, place it perpendicular to the ground, with the zero point on the reading of a pressure gauge facing down.

3. Do not install it in an area that is exposed to high temperature or humidity, because doing so will lead to improper operation.

4. To screw in the pressure gauge, make sure to turn the gauge by placing a wrench over the square wrench flats.

If the pressure gauge is screwed in by holding it on some other area, air leakage or damage may result.

1 Vacuum Release Valve with Restrictor: SY5A2R

- Line for vacuum adsorption transfer
- Built-in restrictor in the vacuum release valve
- Can be mounted on the SS5Y5-20-type (Individual wiring type) and SS5Y5-20P-type (Flat ribbon cable type) Manifold
- Valve effective area

Symbol

How to Use Manifold

⚠ Caution

<20/20P Type>

A piping port is different from that for the standard product. When not connected properly, the product will not operate properly.

[P port: External pilot port, EA port: Vacuum release pressure port, EB port: Vacuum suction port]

<20P Type>

1. **If a large amount of drainage is included in the supply air, it may cause electrical trouble since a wiring unit is located in the place where exhaust from the PE port directly goes through. Be sure to control the supply air.**
2. **For more than 10 stations, both poles of the common should be wired.**
3. **When replacing a solenoid valve, etc., be sure to mount it by placing the solenoid a side on the connector (MIL type) side.**
4. **Terminal no. is not indicated on the connector.**
5. **The terminal no. indicated in the connection schematic of connector, as shown in the reference, means a correlation of 1, 2, 3...26 from the triangle mark side on the flat ribbon cable of connector. (Refer to the reference drawing.)**

2 Vacuum Release Valve with Throttle Valve: SV1A4R-X8

- **For vacuum adsorption transfer**
- **With a throttle valve that can control the flow rate of release air (Slotted type is used to ensure safety.)**
- **Possible to block release air and vacuum at the same time (3 position function)**
- **Compatible with manifold SV1000 series**
