## $\triangle$ Precautions

- SMC will make appropriate arrangements if no dimension, tolerance, or finish instructions are given in the diagram.
- Standard dimensions marked with "*" will be as follows to the rod diameter (D). Enter any special dimension you desire.
$ø 12, \varnothing 16 \rightarrow \mathrm{D}-1 \mathrm{~mm} ø 20, \varnothing 25 \rightarrow \mathrm{D}-2 \mathrm{~mm}$
- In the case of double rod, fill in the dimension when the rod is retracted.
- It is impossible to manufacture when XA17 and XA18 are the same male thread diameter as the piston rod external diameter.
- Please contact SMC separately for the piston rod end pattern part numbers other than the table above and the cases other than the manufacturing conditions.
- The L dimension of the CQ2-XB24 should be made smaller than that of the standard product.
